

Dear Prospective Reviewers,

On behalf of the Editorial Board, the authors, readers, and friends of the *Techno Science* journal, published by the Faculty of Technical Studies, University of Travnik, we would like to invite interested researchers, university professors, and experts in technical sciences to join us as peer reviewers.

*Techno Science* is published twice a year, and papers are written in English, each with an abstract in Bosnian. The journal is registered with the National and University Library of Bosnia and Herzegovina (NUBBiH), and its international indexing is currently in progress. To achieve indexing in major databases, maintaining publication continuity over the next several issues at our current semi-annual frequency is crucial

The journal aims to promote current scientific research in the field of technical sciences, with a strong focus on architecture, civil engineering, construction management, graphic technologies, graphic design, multimedia, and occupational safety and health.

A new issue, new energy, and current research topics are a source of pride and an obligation to make every subsequent issue better and more innovative. It is precisely in this context, with a desire to build a platform joining the knowledge, innovation, and research spirit of our academic community and the broader technical and scientific audience, that we invite you to participate in this project. Our goal is to create a hub where original research, expert analyses, and ideas in the field of technical sciences are accessible to all who wish to share experiences, contribute to the advancement of the field, learn, and grow.

Given that this invitation focuses on defining reviewer engagement, reviewers must, in accordance with their professional, scientific, and ethical standing, provide objective and expert evaluations of submitted manuscripts, along with constructive feedback and recommendations for both the authors and the Editorial Board.

Reviewers' responsibilities align with standard practices for scientific journals, including assessing the scientific relevance and originality of the paper, evaluating the methodology and scientific validity of the results, providing expert feedback and suggestions to improve the manuscript, adhering to ethical peer-review guidelines, and maintaining strict confidentiality.

Therefore, we invite all interested researchers and scholars, wishing to contribute to the growth of *Techno Science*, to submit their basic information:

- Name and surname
- Institution and academic title
- Scientific discipline / field of expertise
- Short biography (CV)
- Contact e-mail

We are looking forward to our future collaboration and your institutional and personal contributions to the development and quality of our - and your - *Techno Science*.

Sincerely,

Editor-in-Chief

Elvedin Bečić, PhD
